

# Participants' Concepts

From the Ideation Workshop

#	OBJECT	NEW INTERACTION
Concept No.	What is the object you want to extend, base your idea on, or, re-design?	What is/are the new interaction(s) you add to the above object?
1	<b>Desk surface</b>	A desk surface that can do more than just supporting the physical objects: it is flexible and can be dragged to grow.
2	<b>Other: Desk</b>	Desks that can be moved via a wireless system.
3	<b>Other: Desk</b>	Desks that can change their form to become whiteboards, elevated surfaces or sitting banks.
4	<b>Other: Ceiling</b>	Whiteboards that can emerge from the ceiling, covering the individual work environment.
5	<b>Other: Ground</b>	Ground-based system covering the individual work environment that starts shaking when someone starts approaching them if the worker is concentrated at the task at hand.
6	<b>Office board</b>	A board of any type, on which co-workers write about their mood every day.
7	<b>Other: Ventilation system</b>	A ventilation system that measures co-workers temperature and o2 requirements with biosensors and regulates accordingly.
8	<b>The joker object</b> (A fantasy object that may require currently non-existing technologies)	An <b>orange elephant</b> available at every individual worker; when put on the desk, it signals that the worker needs some peace.
9	<b>Light</b>	A light covering the individual work environment, changing colors to signal time for socialization (red) and to focus (green).
10	<b>Other: Ceiling</b>	[F]lexible curtains in a grid system in the ceiling, creating privacy, releasing and (a) mindfulness space.
11	<b>The joker object</b>	A system that lets the worker detect who else needs a break or some socialization without interrupting anyone.
12	<b>Other: Office chair</b>	An office chair that detects when the worker's ability to focus drops and moves them away from the work environment to encourage taking a break.
13	<b>Other: Desk separators</b>	Desk separators that become transparent when the worker's ability to focus drops, encouraging them to take a break.
14	<b>Other: Office chair</b>	An office chair that detects when the worker is distracted and encourages them to re-focus by automatically changing its ergonomics.
15	<b>Office board</b>	A digital office board, available at every individual work environment; with which the worker can communicate with their co-workers without physically interrupting them.
16	<b>The joker object</b>	A smart object available at every individual work environment, detecting who is incapable of focusing and encouraging them to take a break together.

Example: Filled-out and (dot-)voted Concept Template.
